

GUIDELINES FOR LIQUID CHEMICAL HOSE MANAGEMENT

CDI

The purpose of this publication is to provide an overview of the various types of hoses used in the production, transportation and storage of liquid chemicals, and their appropriate use and safe management.

While the main focus is on the hoses used for the transfer of chemical products, the essential and frequently used range of service hoses for water, steam, air and nitrogen are also covered.

This guide will be a required publication in the new 8th Edition CDI Ship Inspection Questionnaires for Chemical Tankers and LPG Tankers, which will be published in Quarter 1, 2015.
